

Minseo Cho

📍 20-9, Heukseok-ro, Dongjak-gu, Seoul, Rep. of Korea ✉️ rileyminseocho@gmail.com
☎️ +82 10-7180-2105 / +1 341-237-9252 in minseo-cho03 🌐 MinseoCho03

Research Interests

- AI Reasoning, Multimodal Learning, 3D Vision, Robotics

Education

Chung-Ang University, Seoul, Korea Mar 2022 – Present

B.S. in Computer Science and Engineering

- Cumulative GPA: 4.17/4.5 (MGPA: 4.22/4.5)

Nanyang Technological University, Singapore Aug 2026 – Present

Exchange Student

- Coursework: Quantum Computing, Computer Vision, Parallel Computing, Natural Language Processing

University of California, Berkeley, CA, USA Jan 2026 – Jun 2026

Visiting Student

- Coursework: Artificial Intelligence, Models of Decision-Making from Brain to Behavior

Honors & Awards

UC Berkeley SP-26 Data Case Competition — 1st Place (\$250) May 2026 ⓘ

Stanford x Google DeepMind Hackathon — Top 6 Finalist (\$5,000) Feb 2026

2nd Place (Semi-Final), 5th Place (Final)

Korea–U.S. Advanced Technologies Youth Scholar (\$10,000) Oct 2025 – Jul 2026

Ministry of Trade, Industry and Energy, Republic of Korea

Next Generation Engineering Leader Sep 2024 – Present

Young Engineers Honor Society, National Academy of Engineering of Korea (한국공학한림원)

Humanities Wisdom Scholar Jun 2024 – Present

Platon Academy

Public Data Analysis & Utilization Competition — Excellence Award (₩300,000) Dec 2023

KSPO

Research Experience

Spatial Intelligence Lab, CAU Seoul, Korea

Undergraduate Researcher

Jun 2026 – Aug 2026

- Led research on model-free 6D object pose estimation using multi-view geometry models

MULTI Lab, CAU Seoul, Korea

Undergraduate Researcher

Aug 2024 – Aug 2025

- Presented key papers in NLP, with particular interest in retrieval- and knowledge-augmented LMs
- Implemented multiple instance learning models for whole-slide image analysis, focusing on data preprocessing and model performance comparison

Stanford Next Asia Policy Lab (SNAPL), Stanford University Palo Alto, CA

Visiting Researcher

Jun 2024 – Aug 2024

- Selected as one of 15 scholars, engaging in discussions on emerging challenges in contemporary Asia
- Conducted a data analysis project on political polarization among Stanford and Korean students and presented the findings at the Andong Humanities Value Forum

Manuscripts

Context Matters: Test-Time View Selection and Adaptation for Model-Free 6D Object Pose Estimation

Under Review, 2026

Minseo Cho, Sihyeong Park, Jongmin Lee

Projects

Atlas

Berkeley, CA

Full Stack Developer, Open Project (UC Berkeley)

Jan 2026 – Present

- Built and deployed a centralized internal platform for LG NOVA, consolidating separate documents and databases behind a single interface
- Implemented semantic internal document search using embeddings and RAG for source-grounded question answering

OECDash

Berkeley, CA

Full Stack Developer

May 2026

- Built a React dashboard over OECD private philanthropy data, making cross-country funding flows and coverage gaps explorable for funders and policymakers
- Developed a strategy simulator that takes a budget, natural-language goal, and risk appetite, then recommends an allocation across ranked funding opportunities; won 1st place at the UC Berkeley Datathon

WING (Weighted Investment News Graph)

Seoul, Korea

AI Developer

Aug 2025 – Dec 2025

- Built and deployed an NLP pipeline and FastAPI backend for financial news analysis using embedding retrieval and a finance-domain BERT model, with weighted keyword graphs for relationship and sentiment analysis

Leadership & Service

Stanford Hackathon

Palo Alto, CA

Co-organizer

May 2026

Young Engineers Honor Society (YEHS)

Seoul, Korea

Full Member

Sep 2024 – Present

- Took part in seminars and mentoring led by distinguished speakers and members of the National Academy of Engineering of Korea, and taught hands-on engineering through school outreach programs

Chung-Ang Univ. AI Society (CUAI)

Seoul, Korea

Executive Board (Jan 2024 – Aug 2025), Member (Jan 2023 – Dec 2023)

Jan 2023 – Aug 2025

- Led recruitment and onboarding of new members and developed a curriculum focused on machine learning
- Organized conferences and guest seminars on AI research

LG CNS AI GENIUS

Seoul, Korea

University Ambassador

Jan 2023 – Jun 2023

- Delivered AI education programs (AI chatbots, autonomous logistics systems, smart data lab) to students across Korea, including rural and special education schools

Skills

Languages: Korean (Native), English (Advanced)

Programming: Python, C/C++, Java, JavaScript

Frameworks & Tools: PyTorch, TensorFlow, NumPy, Pandas, Git, Docker, Linux
